---

## Skills

HTML5, CSS3(Materialize, Bootstrap), Sass, Javascript(ES6), Node, Express Javascript, Git/Github, React, PostgreSQL, Sequelize, MongoDB, Python, Flask

---

## Projects

### We-Watch | github.com/dschawel/we-watch-client                    February 2020
- This app allows you to connect with friends and view what they are watching in their queue.
- Sign-in/sign-up functionality that incorporates BCrypt to hash passwords.
- Used MongoDB, Express, Node, and React and implemented the OMDB API.

### Meat-Up | github.com/dschawel/meat-up                    February 2020
- Meet-up app that focused around medieval exotic meats built using React.
- Placed first in the General Assembly 36 hour hackathon and worked with two other developers and a UX designer.

### PetRex | github.com/dschawel/petrex-client                    January 2020
- Worked collaboratively as a team to develop an app that allows you to store digital records of your pets health.
- Full stack app was built with MongoDB, Node.js, Express, React (MERN Stack), Reactstrap and Bootstrap.
- Incorporates JWT tokens to protect routes as well as BCrypt to hash passwords.
- Implements the Yelp API.

### Digital Scrapbook | github.com/dschawel/Digital-Scrapbook                    December 2019
- This app allows you enter a memory, upload a picture using the Cloudinary API and show where it occurred on a map using the Mapbox API.
- This full stack app uses Node.js, Express, PostgreSQL.
- Developed sign-in/sign-up functionality with hashed passwords.

## Experience

### Real Estate Agent, Pointe3 Real Estate                    2019 - Present
- Analyze the needs of my clients to create a comprehensive list of properties for them to see.
- Educate clients about Seattle, as well as the regional real estate market.

### Real Estate Photographer, CollabraTechnologies/TourFactory                    2014 - Present
- Advised agents on how to stage homes for maximum appeal to prospective buyers.
- Shot, processed, re-touched, and delivered photos to the agent within twenty-four hours.

---

## Education

### General Assembly - Software Engineering Immersive - Seattle, WA                    2019-2020
This course was a 480hour+ immersive bootcamp where I gained the skills of a full stack web developer.

### Western Washington University
Bachelor of Arts in Music                    2004 - 2008
